

Eigenharp Pico

The ultra-versatile Pico is simple to use and anyone can play it. Light and portable, it packs a powerhouse of features. Use it to play solo, play and record loops, change scale and key, transpose, alter tempo, program beats, create arrangements, switch and layer multiple sounds, all while playing live. It's ideal as a solo instrument or for playing in a band.

With 18 playing keys and 4 mode keys, a strip controller and breath pipe, the smaller Pico has the majority of the playing features of the Eigenharp Alpha. It plays an unlimited range of sounds and is available in three finishes. The Eigenharp Pico, with its ease of playing and transformational approach to learning scales and music theory, represents a new and easier way to learn to play a musical instrument. The Pico gives you freedom to express your creativity through improvisation like no other electronic instrument in existence.

What's in the box?

- Eigenharp Pico in robust carry case/box.
- Product Activation card for website support and tutorial materials.
- Breath pipe.
- Two mouthpieces.
- Neck strap.
- 3M Pico to computer USB2 connecting cable.
- Eigenlabs 8GB USB stick with latest install software (Macintosh) and getting started tutorials.
- Printed 'Quick Start' guide.
- Printed 'Quick Reference' guide.
-

- 180mm long.
- Sampled at 2000 samples/second.
- 10 bit (1024 values) resolution.

Other features:

- 4 Mode Switches.
- USB powered.
- Conformable, height adjustable thumb hooks.
- Neck strap.
-

Instruments and Soundfonts

You can load and play your own Soundfonts, Audio Unit Plugins and Midi instruments with the Eigenharp Pico. In addition, the Pico comes with its own native instruments (at present a software model of a Cello, Clarinet and a Synth engine). The Pico also ships with a collection of loop libraries and several acclaimed instruments from our partners:

- 1500 AIFF format (timestretch and tempo change capable) varied Percussion and Drum loops.
- Sampletekk 'Black Grand Steinway D, sampled at 20+ levels in a 6 Gigabyte set that includes three recordings from dry to highly ambient.
- Sampletekk 'Tubed Rhodes', a multi sampled Rhodes Electric Piano.
- Sampletekk 'Tubed Wurli' electric piano in a Gigabyte multi sample set.
- Camel Audio's Eigenlabs Player version of "Alchemy" - The ultimate sample manipulation synthesizer

System requirements

- Mac OS X 10.4 or higher / Windows 7
- Intel processor with 2GHz or higher.
- 2GB RAM.
- 10GB free HD space.
- USB 2.0 compatible USB port.
