

Voiis Stereo Wireless Music Gateway

The Voiis Stereo Wireless Music Gateway is a simple way to stream music to and from your home stereo via stereo Bluetooth. You can stream music from your Mac/PC to the home stereo, from the iPhone/Bluetooth-enabled mobile phone to the home stereo, and from the home stereo to a stereo Bluetooth headset. You can even stream music from your iPod to a stereo Bluetooth headset.

Why You Need the Voiis Stereo Wireless Music Gateway

If your wish list includes a music solution that bridges the gap between your iPhone/Bluetooth-enabled mobile phone and your home stereo, which you had begun to feel was not being put to use, then you need the Voiis Stereo Wireless Music Gateway. Here is a look at its excellent features.

- Provides your home stereo system with wireless connectivity
- Provides a range of extended usage up to 100 meters for Bluetooth Class 1 when connected to Class 1 devices
- Wirelessly streams songs from your iPhone/mobile phone or PC to your home stereo
- Wirelessly streams the audio from the Television and CD player to Bluetooth headset
- Fast one-button pairing and easy switch between music transmission and reception
- The Voiis Stereo can also be used with the iPhone 3G (OS3.0/above) and the iPhone 3GS
- Works with Mac computers that are OSX 10.5 and above
- Connects automatically to the last connected device

Party On With the Voiis Stereo Wireless Music Gateway

If you are suddenly in the mood for a party or want to listen to your favorite song on your home stereo, then you need the Voiis Stereo. This is the ideal solution for music lovers who have wished to have all their songs under one roof at a touch of a button.

Voiis Stereo Gateway

Voiis Stereo is a wireless music gateway, which can connect music source, (TV, home stereo, MP3 player, iPod, mobile phones and PC/laptop) to playing devices, via wireless bluetooth technology. People can enjoy any stereo system's music anywhere and anytime they want.

With Voiis Stereo, users can enjoy mobile music by paired Bluetooth stereo devices, such as iPhone, Bluetooth-enabled mobile phone, or Bluetooth earphone. Voiis Stereo can also send Bluetooth-enabled mobile phone's or Bluetooth-enabled Mac/PC's music to high-quality Stereo Systems to play. It brings the freedom of distributing music all over your home.
